

3.5.16. How to Import Data from Unleashed

To import data from Unleashed, open the **Unleashed connection** dialog by clicking menu **File > New > Unleashed connection**.

The screenshot shows a dialog box titled "Unleashed connection". It contains the following fields and controls:

- API ID:** A text input field containing the value "ee2f05d1-a057-4c77-baae-5e191c09c0ae".
- API key:** A text input field containing the value "0iBWPY0kd3Hfc3CLINj8YGHy61BxfWTuKsYBSGn2YaOcXfOTy4kWvNY6fEzCVLupK3NcfXTypaiQkgpW9SLYY4==".
- Starting from:** A date picker control showing "1/1/2013".
- Group by:** A dropdown menu currently set to "Month".
- Buttons:** "OK" and "Cancel" buttons at the bottom right.

To retrieve data from Unleashed, the connector requires entering the API Id and API Key of your Unleashed company. To get this information, please go to the following page:
<https://go.unleashedsoftware.com/v2/Integration/Api>.

Set the beginning point of the data from which you want to import using the **Starting from** option.

To get accurate forecasts, we recommend providing Streamline with at least 24 months of sales history.

2019/05/21 13:44

The Importer can automatically aggregate your data in periods (days, weeks, months) using the **Group by** option. So for example, if you would like to see the forecasts, procurement plan, and other reports in months, group the data by month.

After filling in the necessary information, click **OK**.

The screenshot shows the GMDH Streamline 4.3.5 software interface. The top menu includes File, Item, Process, and Help. The main toolbar contains buttons for New, Open, Save, Update data, and Forecast as of. The forecast is set for 'Incomplete Jan 2017' with a horizon of 12 months. A search bar and 'Approve/Unapprove' button are visible. On the left, a tree view lists items under 'All items', including Consumable, Furniture, Material, and various bike components. The main area displays a table with columns for months from Feb 2015 to Nov 2016. The table includes rows for Actual sales, Statistical forecast, Forecast adjustments, Average sales price, and Revenue. Below the table is a line chart showing 'All items' revenue from Feb 2015 to Aug 2017, with 'Actual sales' plotted. On the right, a properties panel shows settings for Forecast approach, Zeros are lost sales, Ignore data before, Model, Use model from, Multiplier, Holidays, and Approval status.

	Feb 2015	Mar 2015	Apr 2015	May 2015	Jun 2015	Jul 2015	Aug 2015	Sep 2015	Oct 2015	Nov 2015
Actual sales	6	6	0	0	45	147	10	75	50	21
Statistical forecast										
Forecast adjustments										
Average sales price	78.94	401.44			63.25	46.27	477.83	81.2	239.86	24
Revenue	473.63	2408.67	0	0	2846.27	6801.65	4778.34	6090.15	11993.21	51
